**ABSTRACT**

The goal of this survey is to find out either people are avoiding going out at restaurants as a preventive measure, to find out either the same number of people are going at restaurants during this plague, to investigate restriction on transportation flow and lockdown have effects on restaurants. To analyse the effects of Coronavirus on restaurants, a questionnaire comprised of nine questions is constructed. Questionnaire is not formed for any specific nationality. It is circulated on Facebook and WhatsApp in order to make this research successful. It is easier to get responses through social media because the situation is not in favour of getting responses by interacting with people. This questionnaire sent to almost 654 persons and 310 individuals do responses. The response rate of this research is round about 47% which is good than other online surveys. To know the
effect of corona virus on restaurants, several types of charts were constructed, and percentage analysis was also used to get the results. According to this research, it has been concluded that almost people are avoiding going out at restaurants in order to protect themselves from this pandemic coronavirus and many of them are stuck at homes due to lockdowns. it is markedly affecting the restaurants as almost every industry throughout the world. People are experiencing shortage in food and high prices due to Covid-19. Restriction on transportation flow and lockdown have effects on restaurant sale.

**INTRODUCTION**

Coronavirus disease 2019 (COVID-19) is spreading worldwide very quickly, and because of its quick spread, the world is facing severe chaos. As the pandemic coronavirus is affecting everything, it has markedly affected restaurants as well. World needs vaccine to get rid of this pandemic. However, instead of developing any vaccination for ending this horrific disease, advanced and developed countries like America and china are fighting the war of blame [1]. America says, it was created in laboratory in china whereas china says they have no hand in its creation and it is a natural plague. The situation can only move towards normalcy when the world succeeds to find out any solution for the sake of to end this pandemic [2].

This research intends to examine the effects of coronavirus on restaurants. Since, most of the countries have been put under lockdown, People are unable to go out and as they are stuck at homes and not allowed to go out, they cannot go at restaurants, this is what affecting restaurants badly. COVID-19 is pushing the world towards yet another horrific recession. Almost every business has been shut down in the world in the wake of COVID-19 [3]. I have carried out this research to examine how the COVID-19 has affected the restaurants. This research is important as it will be helpful in getting to know how the restaurants got affected by this plague [4].

People are stuck at homes for sake of to protect themselves from this plague. People are very scared, and they do not want to contract this disease, so for to have defence against COVID-19, they are no more going anywhere [5]. People may go out at restaurants, but they need to follow all the precautionary measures which have been stressed from the government. Some of these precautionary measures are, wear masks when you out of home, wash hands for 20 seconds and wash them properly no
place at the hands should be left unwashed, maintain at least five feet distance from each other, try not to shake hands and communicate from staying away each other, do not make any physical contact with anybody [6].

Wash your hands immediately if you touch anything. In case if you feel any of these symptoms in yourself then hurriedly get checked yourself from any nearby servicing centre for COVID-19 [7]. Symptoms are, having a slight fever, having pain in the body, feeling difficult to breath, having dry cough. This disease is a contagious and it spreads person to person through respiratory system [8]. That is why people are avoiding going out at any crowded place. Probably this factor is affecting restaurants critically [9].

Objectives

The aims of this investigation are following:

- To find out either people are avoiding going out at restaurants as a preventive measure.
- To find out either the same number of people are going at restaurants during this plague.
- To investigate restriction on transportation flow and lockdown have effects on restaurants.

MATERIAL AND METHOD

To analyse the effects of Coronavirus on restaurants, a questionnaire comprised of nine questions is constructed. Questionnaire is not formed for any specific nationality. It is circulated on Facebook and WhatsApp in order to make this research successful. It is easier to get responses through social media because the situation is not in favour of getting responses by interacting with people. This questionnaire sent to almost 654 persons and 310 individuals do responses. The response rate of this research is round about 47% which is good than other online surveys.

Statistical Analysis

To know the effect of corona virus on restaurants, several types of charts were constructed, and percentage analysis was also used to get the results.

RESULT AND DISCUSSION

The fallouts of this inspection are itemized in the following Charts.
Figure 1: Prefer going out at restaurants

This chart shows that 55.80% people prefer going out at restaurants whereas 32.70% people said that they do not prefer going out at restaurants. 11.50% people were unsure about it. this data is not for coronavirus however it is asked generally if they go or not in normal days.

Figure 2: Going out at Restaurants during Covid-19

This figure shows that 67.90% people are not going out at restaurants out of fear of contracting Coronavirus and other restrictions. while, 28.30% people said they are still going out at restaurants despite coronavirus. 4.80% people are unsure about both the cases.
Figure 3: Experience any shortage in the food at restaurants during Covid-19

This graph shows that 43.40% people agreed that they are experiencing shortage in the food at restaurants due to Covid-19 whereas, 30.20% people said that they do not experience any shortage in the food. 24.40% people remained unsure about this case.

Figure 4: Avoiding Junk/Outside food

From this picture it is known that almost 68% people agree that they are avoiding the junk/outside food while 20.80% people disagree on the statement.
Figure 5: Going out at restaurants despite high-prices due to Covid-19

This graph tells that almost 80% people said that they are avoiding going out at restaurants because of high prices due to Covid-19.

Figure 6: Getting the same service as before Covid-19 at restaurants

This figure shows that 67.30% people said that they are not getting the same service as they were getting before coronavirus outbreak at restaurants.
This graph tells that 70% people agree that they are unable to go out at restaurants due to Lockdown.

This figure shows that restrictions on transportation is affecting people and resisting them from going out at restaurants as almost 60% people are agreed with this.
This graph shows that almost 90% people said that they are avoiding going out at restaurants in order to keep themselves protected from this pandemic Coronavirus.

**Conclusion**

According to this research, it has been concluded that almost people are avoiding going out at restaurants in order to protect themselves from this pandemic coronavirus and many of them are stuck at homes due to lockdowns. it is markedly affecting the restaurants as almost every industry throughout the world. People are experiencing shortage in food and high prices due to Covid-19. Restriction on transportation flow and lockdown have effects on restaurant sale.

**Future Perspective**

The future research should be carried out on how restaurants manage or handle the current situation during lockdown due to COVID-19.
